360 Wellness turns one

Sri Lanka's leading Cosmetic and Aesthetic Physician Dr. Sarah Fazy's clinic 360 Wellness turned one, celebrating with an intimate gathering on 8 August. 360 Wellness is all about the balance of beauty both from within and from what is visible on the outside.

Dr. Cherry, as Dr. Fazy is fondly known, combined her passions of becoming a doctor and skincare when she chose to become a cosmetic physician.

"This milestone was and is a dream. A day in my life can be extremely challenging, but my clients and their wellbeing are as important to me as my family and that is what 360 Wellness has been

Sherry hosting the event

built upon," Dr. Cherry said on celebrating this anniversary.

From providing cosmetic treatments and procedures such as scar management, hyperpigmentation treatments, skin tightening, and hair reduction, to pigmentation corrections, chemical peels, body contouring,

and dermal fillers, 360 Wellness conducts every procedure possible with the latest technologies and best of care and service.

The future of 360 Wellness will be focused on offering a unique combination of cosmetic and Ayurvedic treatments, a premier wellness tier of state-of-the-art procedures and also the opportunity for clients to engage in many services under one roof – including a gym, dental services, body and hair treatments, weight loss, and more.

For more information on the services offered and future updates, visit <https://360wellnessbydrcherry.com> or follow it on social media on [drcherry_sl](#) and [360wellness.sl](#)
